financial close  
automation**

# About Aico

Disrupting the Cloud Financial Close Solutions market with a customer centric approach.

Financial close automation SaaS

Companies in Finland, Latvia, Germany and UK

Triple digit growth

50 enterprise customers

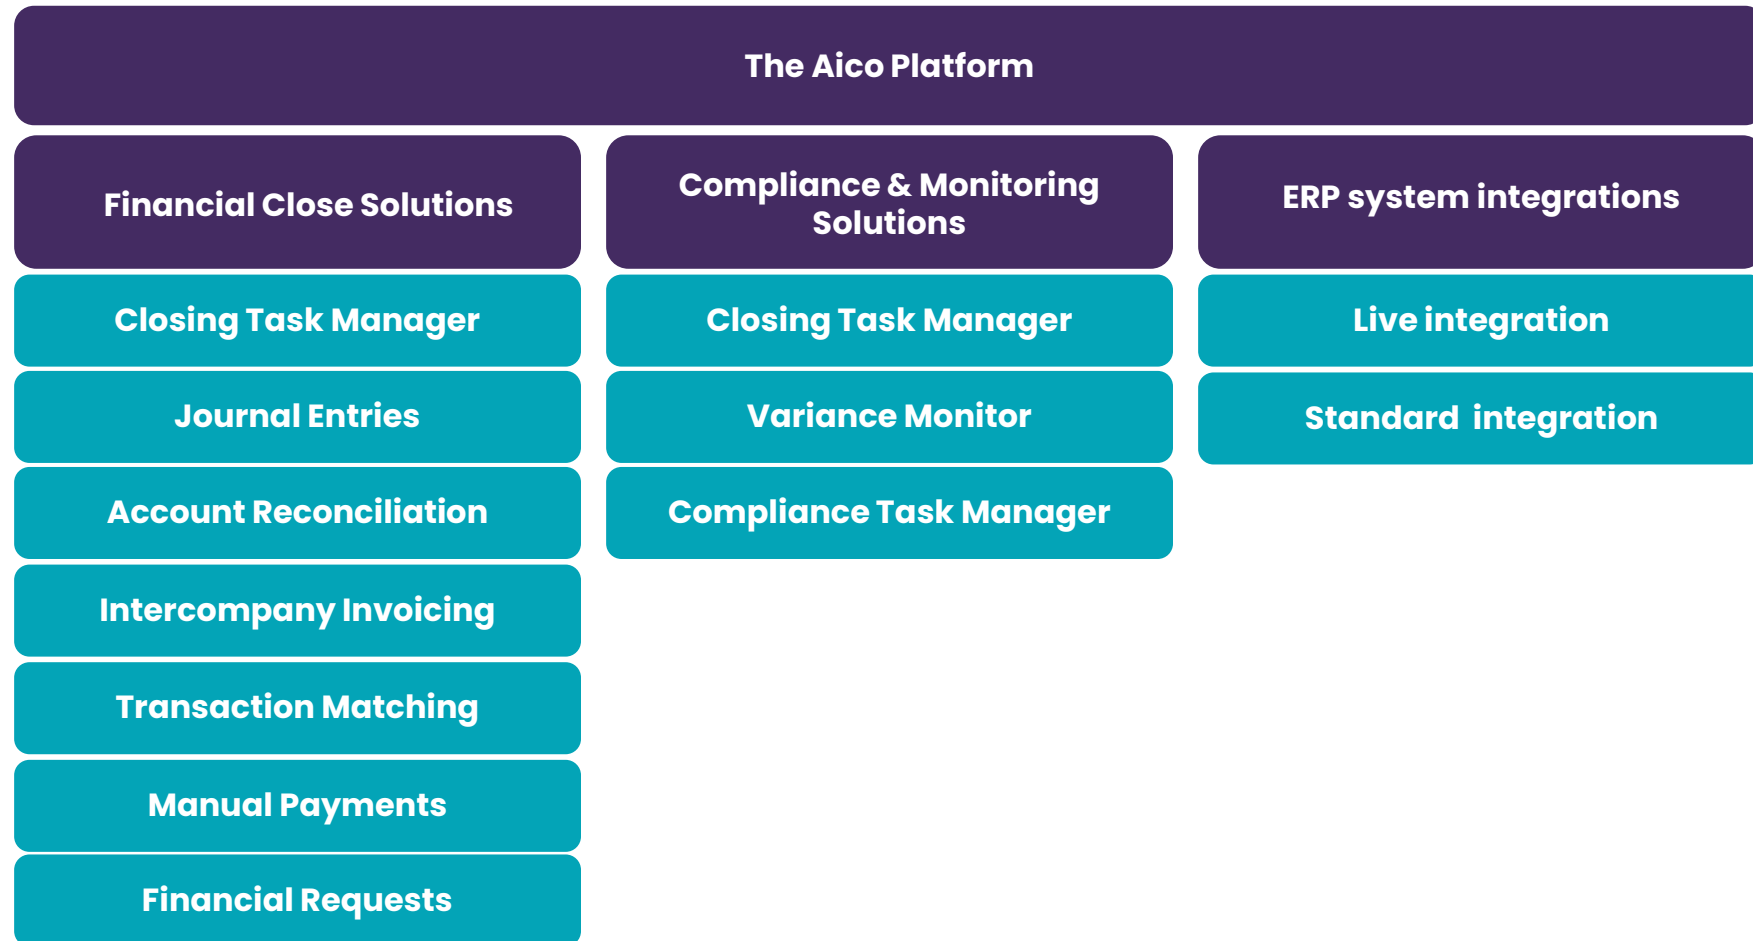

Global end-user base

Serving customers since 2008

# The Aico Platform is built from interconnected solutions

# Aico: A truly unified platform for large enterprises

## Unified platform

A truly unified platform, with all its solutions and integrations interconnected and working in synergy, as opposed to disjointed platforms that share only the branding and user interface appearance.

## Real-time accounting

Real-time accounting is possible. Aico's industry-unique live ERP integration ensures data can be streamed instantly rather than downloaded and uploaded in periodic batch files.

## Hyper-configurable

The unique as standard. Our solutions are built on a hyper-configurable platform, ensuring that even the most complex enterprises can configure Aico to match their ideal accounting processes.

## Exceptional support

Unparalleled and award-winning in-house customer service provides access to experts who work closely with enterprises to address issues and customise solutions to meet specific requirements.

# Aico is built to scale with your business

## Unlimited user seats

- No costs related to user seats.
- Aico customers have on **average 435 Aico Platform end-users.**
- “We were able to grant Aico access to business-facing finance like controllers, HR and others for journal preparer roles.”

## No hidden costs

- Aico customers pay on **average for only 2.5 hours of billable support services monthly.**
- “Easy to deploy and administrate. Excellent support available in the rare occasions when we've needed support at all.”

## Continuous development

- Unlike the category leaders, Aico grows its platform through development rather than acquisitions, which ensures all solutions on the Platform work seamlessly.
- Aico delivers 2 major product releases per year.
- Aico added 4 new solutions to its platform during the last 24 months.

The image shows four G2 award shields for Enterprise Winter 2024. Each shield has a red banner at the top with the G2 logo. The shields are: 1. High Performer (red banner), 2. Easiest To Do Business With (green banner), 3. Easiest To Use (yellow banner), and 4. Best Support (green banner). All shields have a white banner at the bottom with the text 'Enterprise WINTER 2024'.

# Unique live integration to major ERPs

Aico supports all major ERP systems and instances, regardless of your group organisation's variety and size:

Besides its industry-leading integration that supports all ERP systems, **Aico has created a unique real-time integration for SAP S/4HANA, SAP ECC, Oracle EBS, Oracle Fusion and Microsoft Dynamics 365.** Data between these ERPs and Aico is streamed in real time instead of transferred via periodic file downloads and uploads. This allows you to refresh the latest financial data from your ERP in seconds, not hours or days. Aico's real-time ERP integration stands out as both unique among financial close solutions and best-in-class.

# Aico – a platform designed for the complexities of large enterprise finance

- The average annual revenue of an Aico customer is €7bn.
- Aico excels at handling complex finance processes involving legal entities scattered across multiple countries, a variety of currencies and local tax regulations.
- The Aico Platform is industry and ERP agnostic – suitable for all businesses and IT landscapes.
